

REMARKS

The restriction requirement of April 29, 2005 has been carefully studied and found to be proper. In response thereto Applicants elect claims 1-9 and new claim 14, the latter claim being a dependent claim and covering the catalysts set forth in Examples 2, 4 and 6 of the application. As for the former "use" claims, they are presently amended so as to provide conventional process language, and according to Patent Office practice, once the composition claims are found to be allowable, such process claims dependent on the allowable composition claims will be rejoined and also found allowable.

Also, in the present paper, amendments are made to the claims to utilize formal Markush language without intending to limit the claims in any manner.

In view of this response to the restriction requirement, an early action on the merits is respectfully requested.

The Commissioner is hereby authorized to charge any fees associated with this response or credit any overpayment to Deposit Account No. 13-3402.

Respectfully submitted,

I. William Millen, Reg. No. 19,544
